- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Regarding claim 1, Balogh teaches a method for selecting a communication system to be used by a mobile unit to conduct a data session, the method comprising:

- a) determining a set of valid communication systems available to the mobile unit, the set of valid communication systems including at least two disparate types of communication systems (i.e., determining logical WLAN networks NW1, NW2 as shown in figure 1, see paragraphs [0031] [0033] and [0052]);
- b) selecting a communication system from the set of valid communication systems (see paragraph [0039]).
